scan to open on your phone

SECTION 1

Overview

What this template gives you

- **Pure static** — hosts free on GitHub Pages
- **Works offline** — installable, no internet after first load
- **1-D navigation** — any arrow steps the talk
- **Beamer-style chrome** — section headline + footer
- **Speaker view** with notes & timer
- **Offline math** via KaTeX
- **Draw on slides** (chalkboard)
- **Grouped overview** — scroll to browse
- **Floating PDF download + QR**
- **Narration playback** from object storage

The bar at the top shows the section; the footer shows presenter, title, date and page.

SECTION 2

Navigating

Navigating (1-D / linear)

Every direction moves one step:

-    — next
-   — previous
-  or the grid button — the map view

Presenting:

-  — speaker view (notes + next + timer)
-  fullscreen ·  black · 
pen
-  +click — zoom a figure

The map view (press `Esc`)

- all slides are laid out as a **map, grouped by section** (one column per section)
- **drag** to pan · **scroll / pinch** to zoom — smoothly, like a map
- **click a slide** to jump there; `Esc` again to return

Try it: press `Esc` now, pan and zoom, then click a slide.

SECTION 3

Writing slides

Step-by-step reveals (fragments)

Step-by-step reveals (fragments)

- First this idea appears...

Step-by-step reveals (fragments)

- First this idea appears...
- then this one...

Step-by-step reveals (fragments)

- First this idea appears...
- then this one...
- **tip** fragments can *highlight*, *grow*, or *fade*.

Step-by-step reveals (fragments)

- First this idea appears...
- then this one...
- **tip** fragments can *highlight*, *grow*, or *fade*.

The deck advances only when the fragments run out.

Mathematics (KaTeX, offline)

Inline like $\hat{y} = f(X)$ and displayed:

$$\frac{\partial L}{\partial w} = \frac{\partial L}{\partial \hat{y}} \frac{\partial \hat{y}}{\partial h} \frac{\partial h}{\partial w}$$

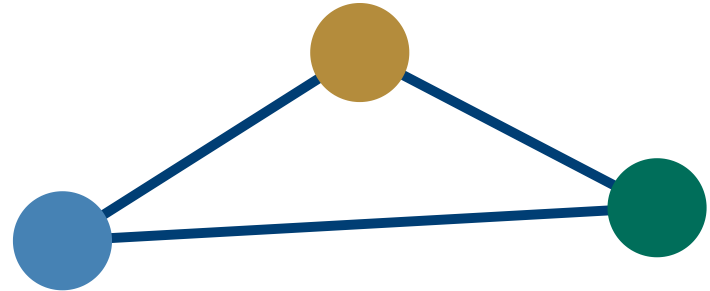

$$P(j \mid i) = \frac{e^{-\beta c_{ij}}}{\sum_k e^{-\beta c_{ik}}} \qquad T_{ij} = k \frac{O_i D_j}{f(c_{ij})}$$

Rendered locally — no internet needed.

Columns & figures

Text beside a figure with
`.cols`.

- soft shadows
- auto-styled captions
- inline SVG diagrams

An inline-SVG diagram — themeable, no image file.

Animated diagrams

SVG animates with no
JavaScript — loops offline.

A marker tracing a curve.

Code highlighting

```
1 Reveal.initialize({  
2   navigationMode: 'linear', // 1-D  
3   progress: false,  
4   plugins: [RevealHighlight, RevealMenu, RevealChalkboard]  
5 });
```

Tables & callouts

Action	Key
Map view	Esc
Speaker view	S
Pen	C
Zoom figure	Alt + click

Note — neutral emphasis.

Good — a result callout.

Watch out — a caveat.

SECTION 4

Presenting

Draw on your slides

- `C` — toggle the pen · `B` — blank chalkboard · `Del` — clear
- drawings persist while you navigate

Try it: press `C` and scribble, then `C` again.

Speaker view

- press `S` → a second window with the current & next slide, your `<aside class="notes">`, a timer and a clock
- show it on your laptop while the projector shows the deck

SECTION 5

Share & offline

Narration playback

Pre-record audio, host it on object storage, list it in a manifest — the page plays it and auto-advances.

- the ► **Play narrated** button appears only if audio exists
- one clip per slide → re-record any slide independently
- the page only *loads* and plays — no recording

Demo ships 3 clips — press ► **Play narrated**.

```
// narration/manifest.json
{
  "base": "https://cdn.example.com/talk/",
  "clips": { "intro": "s00.m4a", "overview": "s00.m4a" }
}
```

keys match each slide's `data-audio`. Bucket must allow CORS.

Offline & installable

A service worker caches the deck on first load.

- present with **no internet** afterwards
- “Install / Add to Home Screen”
→ runs like an app

✈ works in airplane mode
after first visit

Share & download

- floating **Download PDF** (first slide) → `slides.pdf`
- the **QR** opens the live URL on phones
- PDF is generated *from this HTML* (see README)

your live URL

SECTION 6

Deploy

Reuse this template

1. Click **Use this template** on GitHub → new repo
2. Set `window.TALK` (top of `index.html`) and edit the `<section>` slides
3. Group slides into sections with `<section data-section="...">`
4. Enable **Settings** → **Pages** → **main / root**
5. (optional) add narration clips + `narration/manifest.json`

Full instructions in `README.md`.

Thank you
